

Domino Sosh

Quick start guide

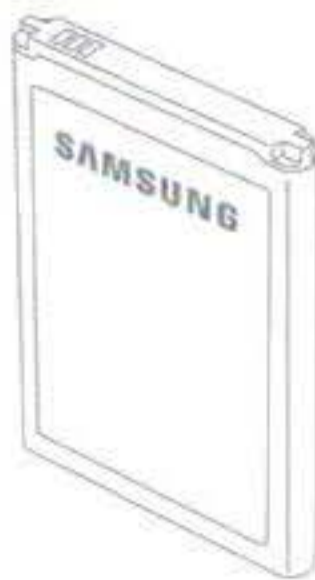

DOMINO SOSH

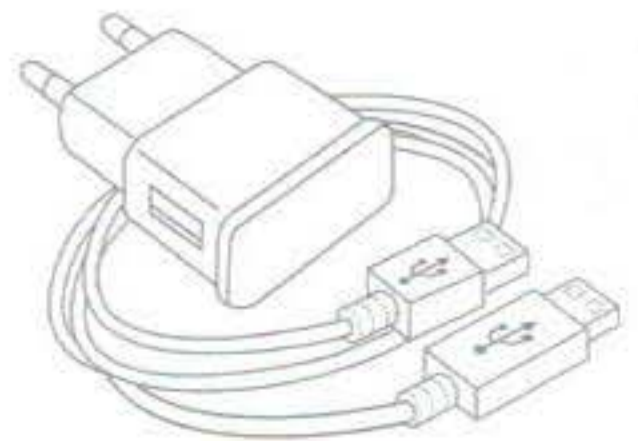

YOU SHOULD HAVE

Domino Sosh

Battery

USB cable and
sector adaptor

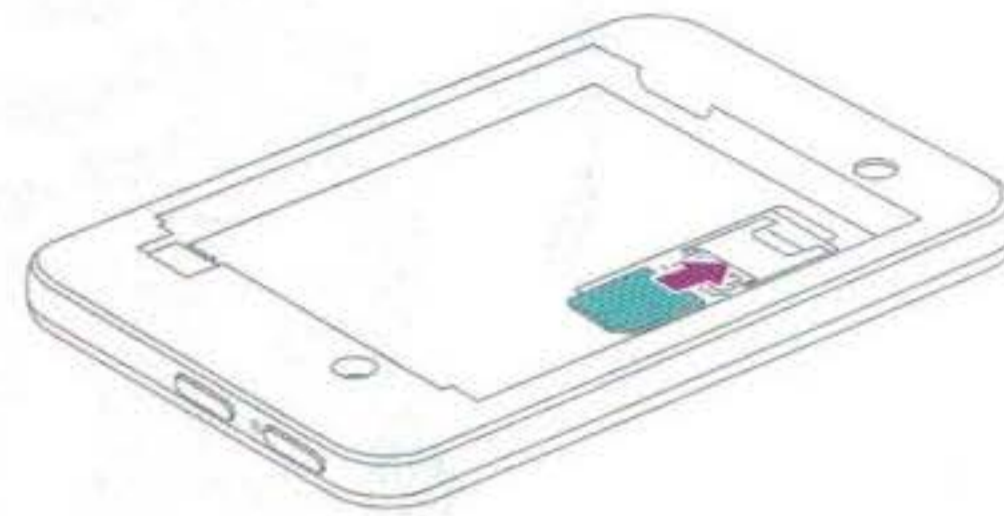

INSERT SIM

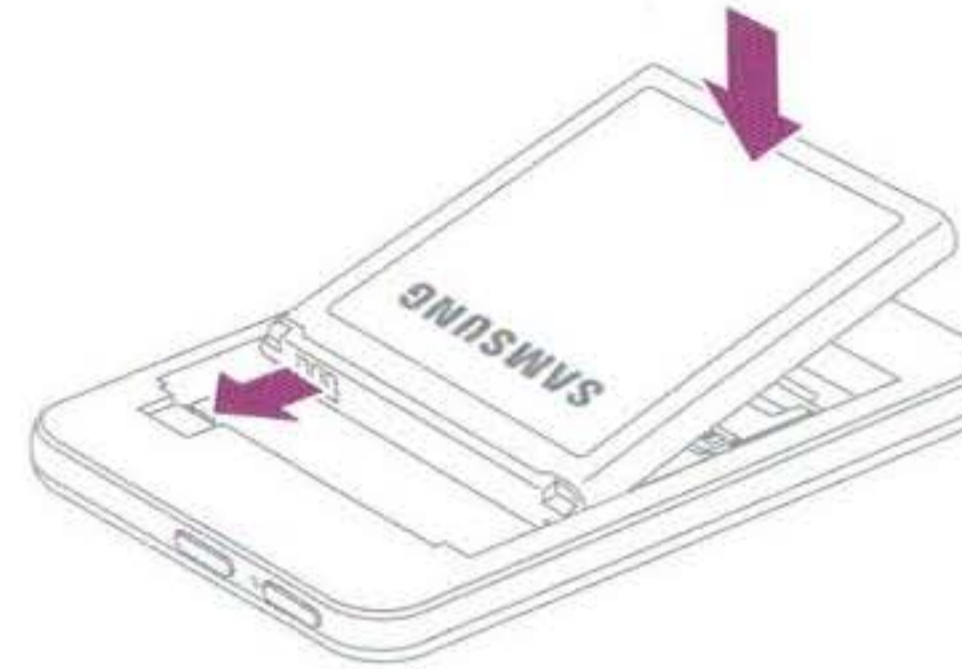

1. Remove the back cover.

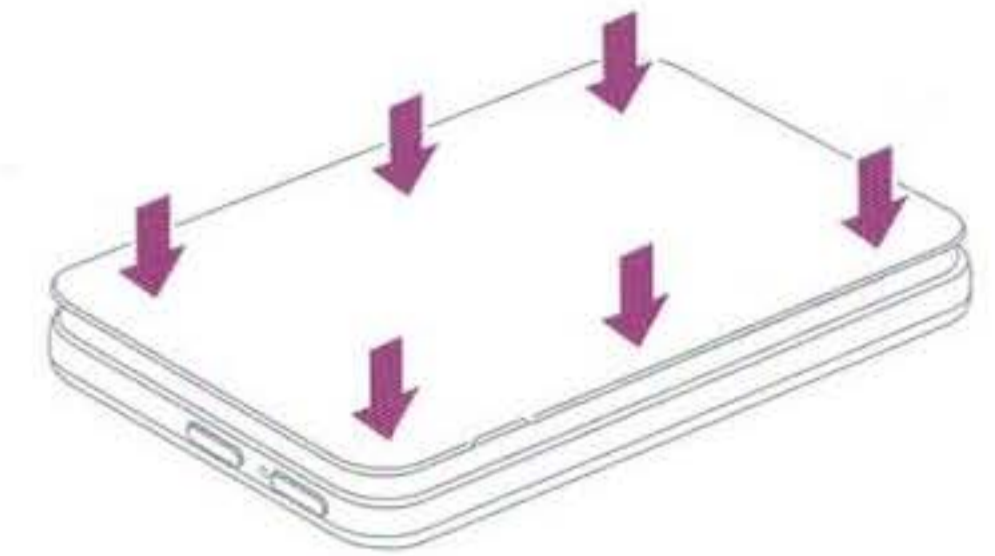

2. Insert the micro-SIM card gold-coloured contacts facing downwards.

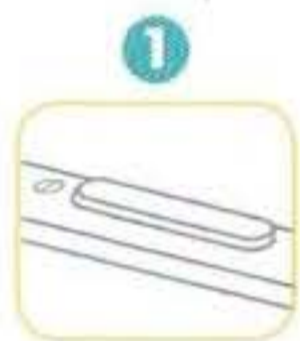

3. Insert the battery.

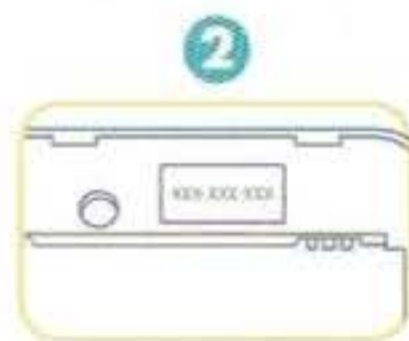

4. Replace the back cover.

CONNECT VIA WI-FI

1. Power on the device.

2. You can find the Wi-Fi credentials by removing the back cover and having a look above the battery.

3. From your PC, tablet or other device, connect to Domino's Wi-Fi network using credentials.

4. Once connected launch a Web browser, Domino's Home page should be automatically displayed. If not then type in the following URL: <http://domino> or <http://192.168.1.1> in case the home page doesn't load.

(Optional) if PIN code is requested you can find this on the SIM card documentation and type it on the pop-up screen.

5. Domino will connect to Internet:
a) Home page will display "Orange F" network.
b) Domino will display a steady blue or green light.

Note:

Default authentication for Domino's Home page - Login: admin, password: admin
